UNIVERSITY OF BELGRADE

SESAR
JOINT UNDERTAKING

Founding Members

What is AUTOPACE?

1. A Fundamental Scientific Research Project on Automation-Human interaction
2. A Research Project on Autopilot Cars
3. An Industrial Research Project to deploy full automation on the ATC Control Centres (ATCo is removed from the loop)

General Project Information

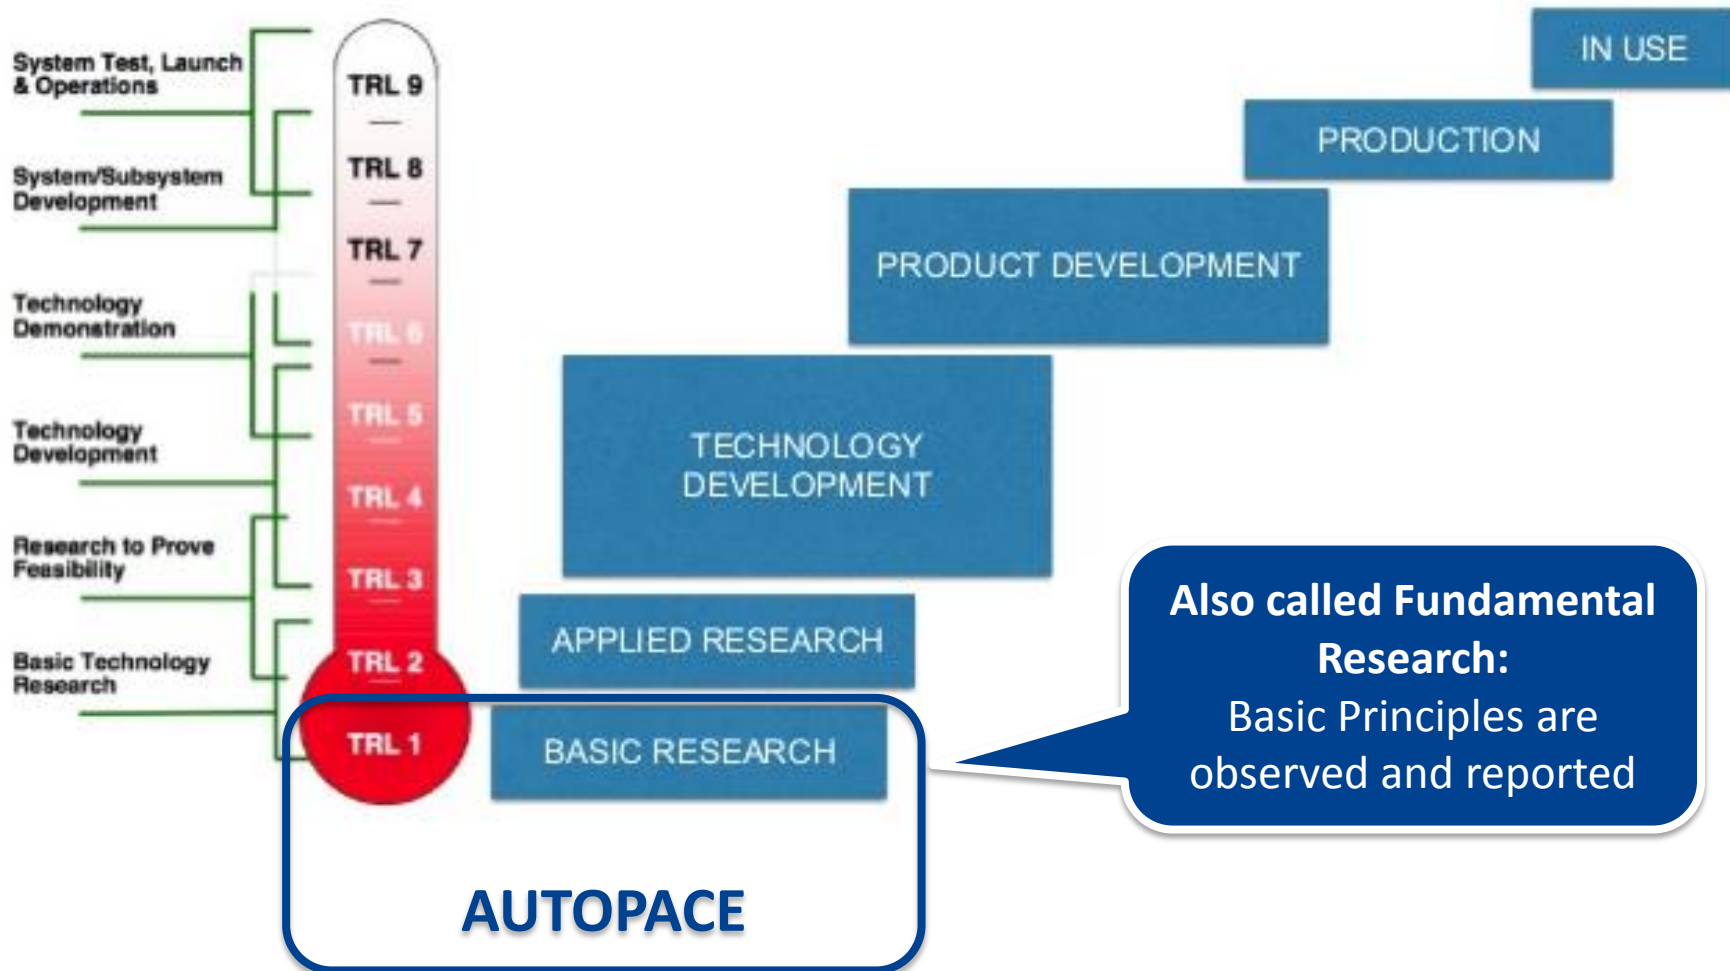

AUTOPACE (Grant 699238) responds to the first Call for Proposals of **SESAR Exploratory Research projects** launched under Horizon 2020 Research Framework Programme.

Particularly AUTOPACE addresses the Research Topic:

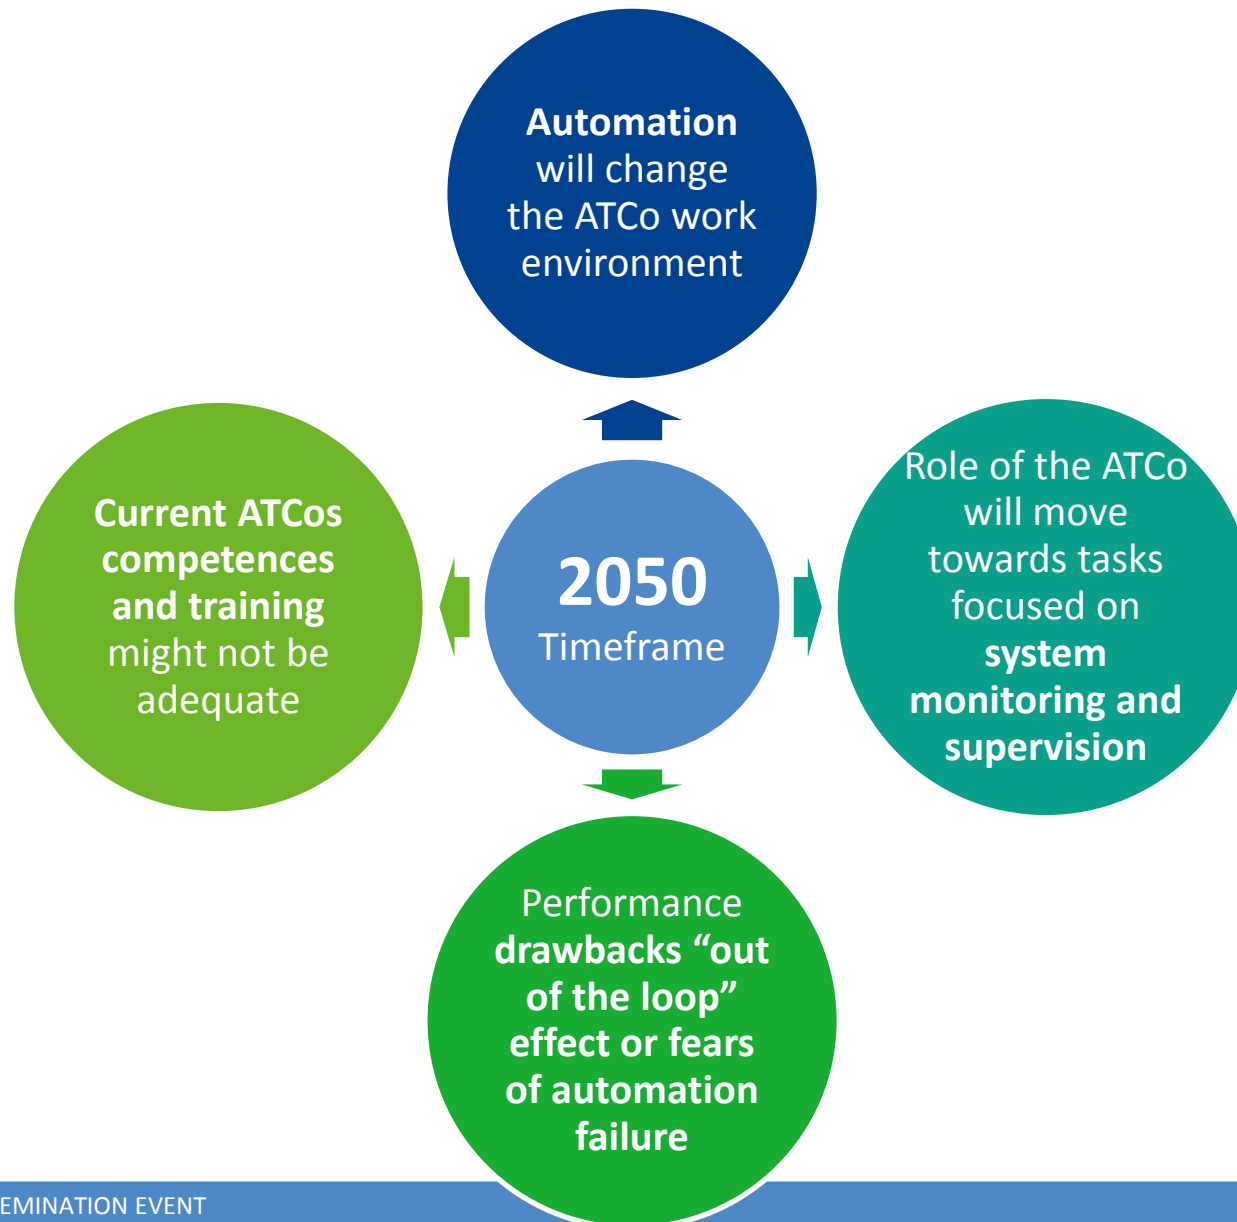

- ***ER-01-2015: Automation in ATM with the aim of increasing the awareness of the interaction between automation and human performance.***

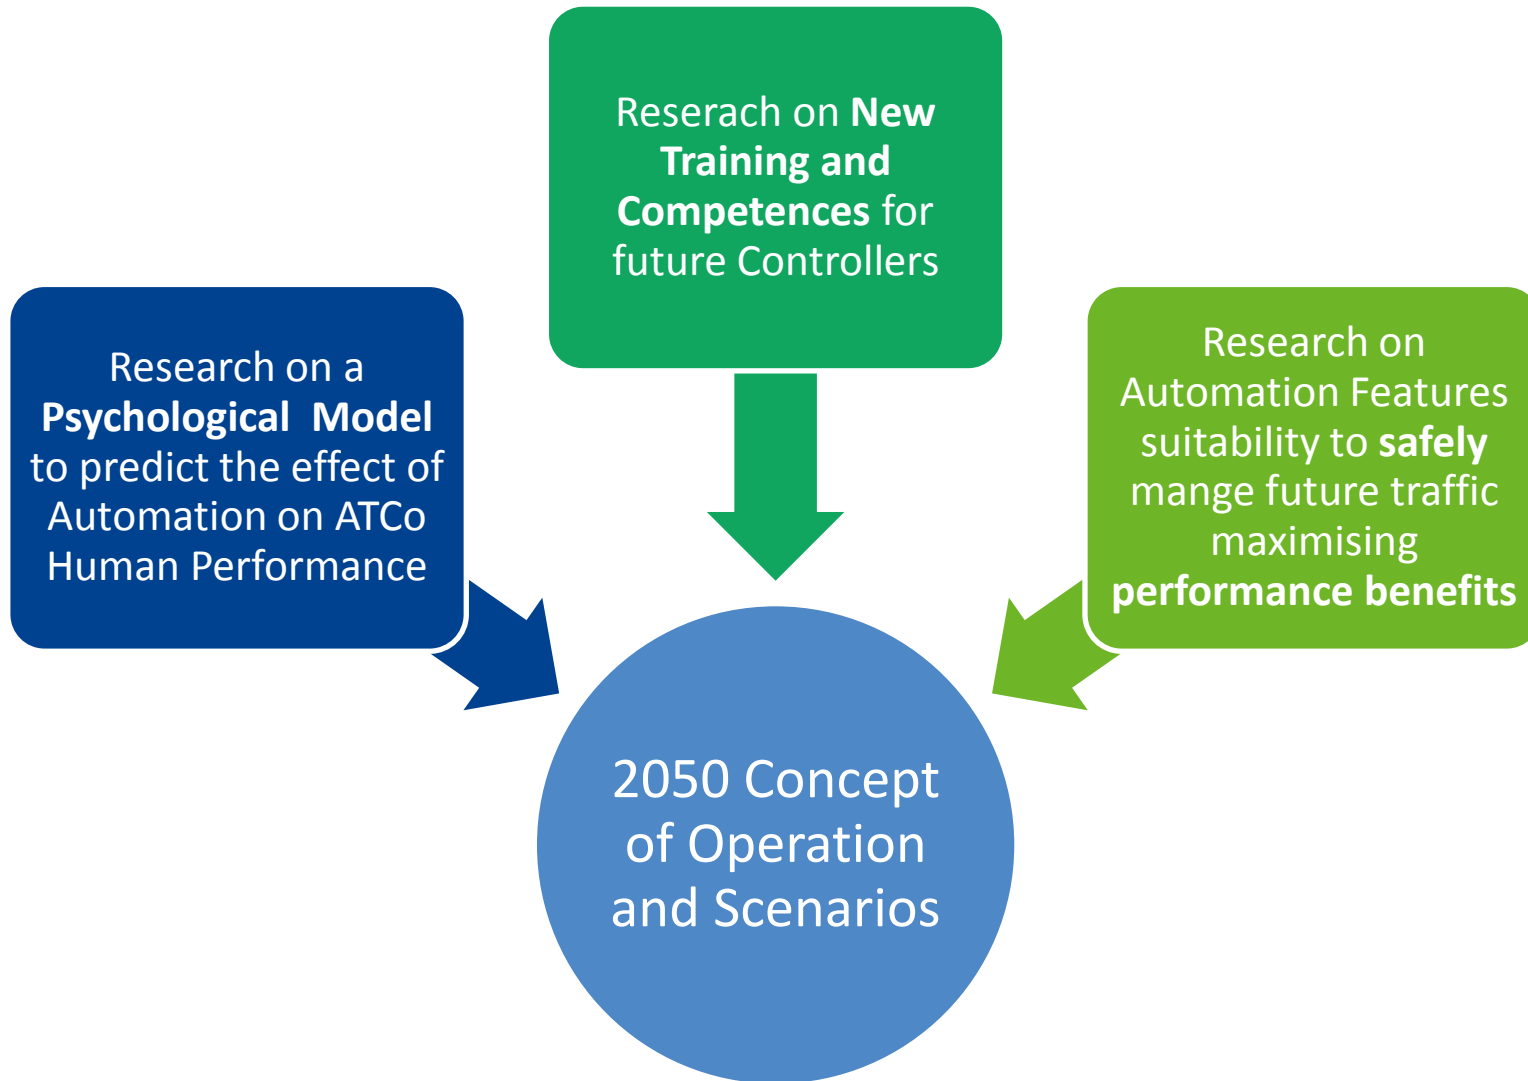

T0 March 1st, 2016 – 2 years duration

AUTOPACE and Technology Readiness Level

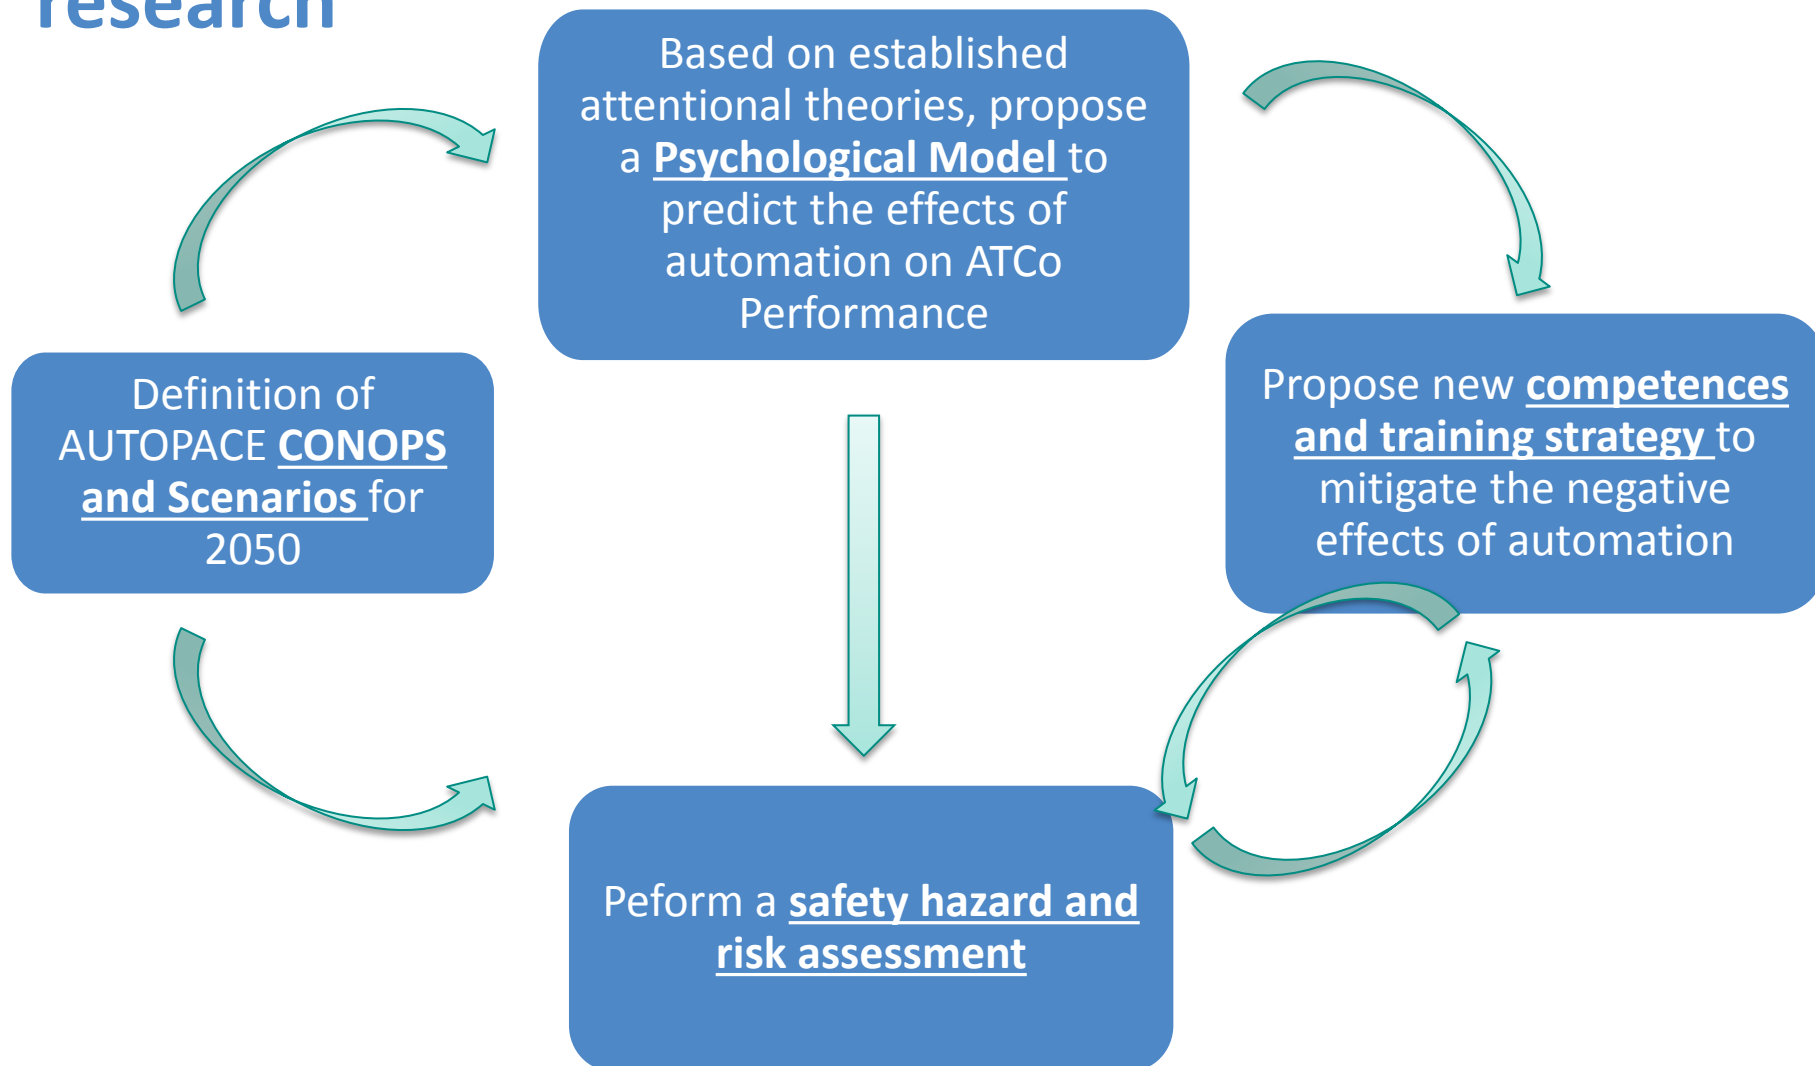

Problems AUTOPACE is addressing...

How AUTOPACE has performed the research
